

Credentials: Roshan Bandara

As a co-founder of 6box, I have a passion for delivering high quality web solutions and satisfying the client expectations. As part of my daily work at 6box, I manage and oversee projects of varying sizes and contribute to the System Development Life Cycle by delivering professional business analysis artefacts, testing and user documentation. The highlights of my work so far include Botswana High Commission of Australia, Enink and YourMarbella websites.

I am also experienced in working in the Australian Public Service. I have contributed to a number of large web-based IT projects as an IT contractor to the Australian Taxation Office, the Department of Employment and Workplace Relations and the Department of Immigration and Citizenship. This work involved providing business analysis, testing and attending to helpdesk enquiries.
